HOW TO OPEN YOUR TIN

To keep our products fresh and safe, we use secure, child-resistant packaging. If you are having trouble getting the tin open, try one of the two easy methods below.

1 The In-Hand Method

Hold the tin securely in both hands. Use your thumbs or index fingers to press both front buttons inward at the exact same time . While maintaining pressure on the buttons, use your other fingers to gently lift the lid upwards.

Step 1 - Hold the tin

Step 2 - Press both buttons

Step 3 - Lift the lid

2 The Tabletop Method

If you need a little extra leverage, place the tin flat on a hard, stable surface like a table or counter. Using your index fingers, push the two front buttons straight in toward the tin. Once pressed, simply flip the lid open.

Step 1 - Press buttons on table

Step 2 - Lift the lid

HELPFUL TIP

The key to the locking mechanism is simultaneous pressure. Make sure you press both buttons at exactly the same time, rather than one after the other, to release the internal latch before lifting the lid.
